Established contacts in the region, a dedicated workforce and an exacting standard for completion have gained the company a competitive edge well recognized in the industry. Our advantage also lies in our ability to bring solutions to the client's requirements in all phases of project planning and execution and offers full contracting services and has the flexibility to assist the client by securing additional expertise or feasibility studies, preliminary designs, financing opportunities for optimum project delivery.

Our management consists of highly qualified professionals with a distinguished track record in the UAE. Our Staff seeks the challenges to broaden their experts & skills that keep them ahead in the industry.

Scope

AAABC scope to set out the specific quality practices, resources and sequence of activities relevant to the project and cover's the development of objectives, execution and verification/validation steps associated with:

1. Design
2. Procurement
3. Construction Management
4. Project Management
5. Quality Assurance Control
6. Resource / Workforce Management
7. Project Control / Planning

Safety & Quality Commitment It's Always Safety First

At AAABC we take care of our people. That's why we insist on the most rigorous safety procedure at every stage of construction, on and off site. Our safety officers undergo regular safety training course, and our employees attend tool-box meeting regularly. We commit to the highest standard of safety practices, because protection each people's life and assets are our top most concern.

It is the stated policy of AAABC to incorporate the principles and practices of safety in all the Company's endeavors.

AAABC is a leader in the industry in the promotion of accident prevention and a safe work environment is a top priority. In every jurisdiction in which we operate we take the time to review the safety regulations, and seek to go beyond the legal requirements to ensure the safety of our employees, the traveling public and all those who may have occasion to enter our worksites.

Our company safety policy commits us to provide active leadership and complete support in order to prevent human pain and suffering from personal injury and economic losses from property damage. AAABC is committed to providing a high level of specialized safety training to its employees, at all levels. This is provided externally through professional safety training associations, as well as internally by our own experienced and trained personnel. We recognize that it takes everyone working together to make AAABC a safe and healthy workplace.

QUALITY COMMITMENT

AAABC employs highly-skilled, well-trained craftspeople with a focus on employee retention. Our team is comprised of dedicated, long-tenured employees with experience throughout many areas of the construction field.

It is the stated policy of AAABC to incorporate the principles and practices of Quality Assurances in all the Company's endeavors.

It is the policy of AAABC that all works performed by the Project Organization shall meet the contractual Quality requirement.

It is the policy of AAABC to develop, produce and deliver products and services which consistently conform to customer requirements, and to pursue the goal of 100% error-free performance through product, process and management quality development.

AAABC has a management philosophy for construction contracting that is founded on two key principles; one of them drives our internal management process, the other defines how we relate to the client.

Internal – Quality is Priority

Internally, AAABC is committed to quality – in our procedures, our products and services, and our relationships with our staff and subcontractors. This means that:

- we set high standards for performance (with management and employee input);
- we create processes and procedures that will best support the achievement of those standards;
- we measure performance according to those standards and run stringent QC (quality control) programs.
